

Join us for the Fall 2016 ILS Children's Workshop!

Monday, December 12th, 2016, 9:00am—1:00pm
Ovitt Family Community Library
215 East C Street, Ontario, CA 91764
Registration: \$20 for ILS Members/\$25 for Non-Members

Presented by the
Children's Center at Caltech

The Children's Center at Caltech (CCC) is a non-profit organization providing high quality early education and care for children ages six months through six years.

The workshop will include these sessions:

**Deconstructing Literacy: a Deeper
Look at Early Literacy
Comprehension**

In this workshop, we will look at how to discuss with children the components of books. We will delve into talking about the author, illustrator, plot, characters and how we use Venn diagrams to help support these concepts. You will have the opportunity to look at the principals of story writing through the use of wordless books and dramatic play.

The Math of Music

Join us for mathematical music, movement, and research! Training the ear of young children, while using musical pattern recognition, is an integral part of math skills. Usage of mathematical intelligence and awareness by pattern recognition is learned through song/tales, echo songs, folk dance, tapping, clapping, and playing barred and percussion instruments.

Complete and return, with payment, by Friday, December 9, 2016.

Make checks payable to Inland Library System.

Please check your registration type: ___ ILS Member \$20 ___ Non-Member \$25
Name(s) _____ Amount enclosed \$ _____
